-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3724

1. In light of Applicant's amendments, the restriction is moot and all active claims will be examined.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Andis et al.'613, who shows a hair trimmer with an ion generator (54,58).

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-8,10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Andis et al.'613.

In regards to at least claims 10-12, Andis shows a switch (46) and cord (end of page 1) but does not show an indicating light. Examiner takes Official Notice that it is old and well known for razors to have a light indicating when power is being applied. For example, Examiner's home razor, purchased many years ago, has such an

indicating light. It would have been obvious to one of ordinary skill in the art to have added a light to Andis, as is well known, in order to indicate to a user that it is on.

In regards to the electrodes, Andis does not discuss details. Examiner takes Official Notice that it is old and well known for ion generators to employ a positive pointed electrode and a negative annular electrode. An example is the portable ion generator of Voelkel (20,22). A second example, from the art of personal care, is the publication to Lau et al. (abstract). It would have been obvious to one of ordinary skill in the art to have modified Andis by making the ion generator be of the type having a positive pointed electrode and a negative annular electrode, as is well known and taught by Voelkel and Lau, in order to optimize the emissions, as set forth by Voelkel and Lau.

6. Made of record but not applied is a patent to Harris showing an ion generator in a hair care tool.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ken Peterson at 571-272-4512, on Monday-Thursday, 7AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Allan Shoap, can be reached at 571-272-4514. In lieu of mailing, it is encouraged that papers be faxed to 703-872-9306.
